List of Figures

Figure 1 HP DC-SL System Overview 5

1 Overview

HP Device Connect - Software Lite (DC- SL) is delivered as an installable .exe file that can be installed on a customer provided physical or virtual machine running one of the following operating systems:

- Windows Server 2019
- Windows Server 2016
- Windows Server 2012
- Windows Server 2012 R2
- Windows 8.1(32 and 64-bit versions)
- Windows 10 (32 and 64-bit versions)

HP DC-Lite comes with the Lite suite of DC applications and is used where remote monitoring and remote management are desired.

HP Device Connect - Software Lite

- HP JetAdvantage Management Connector
- HP Device Connect Update Client

The following diagram depicts the HP DC-SL System concept:

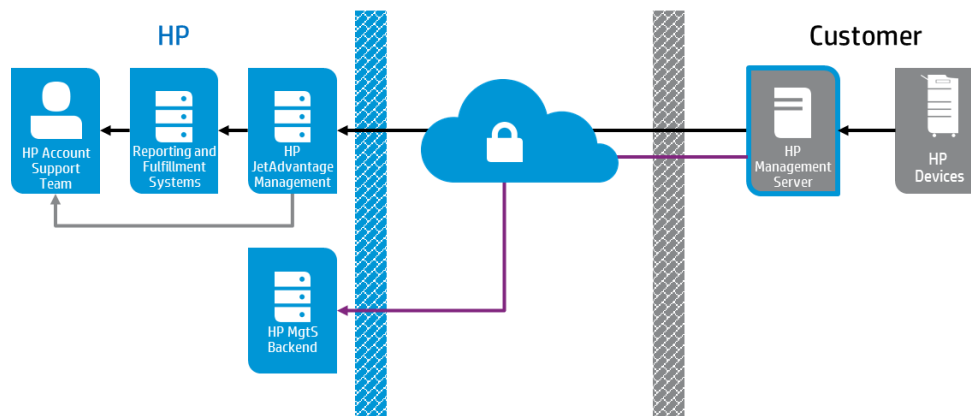

Figure 1 HP DC-SL System Overview

HP DC-SL provides three main functionalities as described below:

- **Remote Monitoring:** HP DC-SL enables remote monitoring as a secure means for collecting and reporting usage and device data for consumables replenishment and support.
- **Remote Management:** HP DC-SL enables remote management of devices in order to facilitate discovery, event troubleshooting, break-fix activities, updating of device configurations and firmware, and non-reporting device remediation.

- **Remote Access:** The client-to-host connection uses peer-to-peer connections, encrypted within a 256-bit AES tunnel.
 - HP DC utilizes LogMeIn (LMI) Central to provide secure remote access.

As a part of the HP DC-SL 6.1 Release, the following are the key highlights:

2 In this Version

This section describes the new and changed features of HP DC-SL v6.1:

HP Device Connect Core Platform updates:

- None

HP Device Connect Solution Component Updates:

- HP JetAdvantage Management Connector upgrade to version 4.1.5810

3 Enhancement and Fixes

HP Device Connect Core Platform updates:

- None

HP Device Connect Client Component Updates:

- **HP JetAdvantage Management Connector 4.1.5810**
The HP JetAdvantage Management Connector shipped on the HP DC platform is now upgraded to the latest version 4.1.5810 thus enabling support for the new product features therein. This version of JetAdvantage Management Connector is available during a fresh install or manual upgrade only.

Note: If Auto Upgrade is enabled for an instance then JetAdvantage Management Connector will not upgrade to version 4.1.5810, but standalone upgrade can be performed from HP DCMC portal.

HP DCMC Portal Enhancements:

- **'Customer Details' page can be saved with non-HP user ID under 'Users' section.**
'Customer Details' page could be previously saved only with users having HP user ID in 'Users' section, now 'Customer Details' page can be saved with users having non-HP user ID in 'Users' section.
- **Users with 'Super Portal Admin' role can re-activate non-HP users from 'Users' page.**
If users (both Hp and non-HP) do not login to HP DCMC portal for more than 30 days then, these users will be automatically marked as not active by the system. Now such non-HP user accounts can be re-activated from the portal.
