

# BRING YOUR i-STAT SYSTEM DATA TO LIFE

## CONNECT REAL-TIME TEST RESULTS WITH YOUR POINT-OF-CARE DATA MANAGEMENT SYSTEM

Rapidly making i-STAT test results available to all members of the care team is critical for improving collaboration and accelerating clinical decisions. Abbott Point of Care makes it possible with our i-STAT/DE solution. It unlocks the advantages of open data integration, seamlessly linking i-STAT test data to your existing data management systems.

- Flexible solution connects your i-STAT test data with EMR, LIS and ADT systems from multiple vendors.
- Streamlines testing workflow by reducing or eliminating manual entry of test data.
- Integration, project management, and partner coordination specialists are available to help achieve a seamless integration experience.

For in vitro diagnostic use only.

## IMPROVE YOUR POINT-OF-CARE PROGRAM EFFICIENCY

Extend the capabilities of the i-STAT System with additional i-STAT/DE features:

- Web-based, Centralized Configuration Control
- Operator Competency Notification of impending certification expiration
- Liquid QC Scheduling and Lockout, Pass/Fail Determination, Customization Ranges (AQF)
- Positive Patient Identification (PPID)

# CONNECT YOUR i-STAT SYSTEM TO LEADING DATA MANAGEMENT SYSTEMS

VENDOR	DATA MANAGER
	  Point of Care Data Management System
	 
 Harvest the Power	 laboratory information system  orchard management & integration
	
	 POCcelerator
	

Don't see your system listed? We are continually working to expand our list of compatible data management systems. Not all products available in all markets. Check with your local Abbott Point of Care Representative for availability.
